

**FORM 6.10**

**Risk versus Risk Choices**

We often try to minimize our risks by doing nothing or by trying to play it safe, but every decision is really a matter of *risk versus risk*. There are no risk-free decisions. Consider a current and a past decision and list them as Alternative 1 and 2, respectively. Now list the risks or downside of doing or not doing whatever is involved in the decision. What are the consequences for you in trying to avoid all risk?

<b>Decision I am considering</b>	<b>Risk of doing it</b>	<b>Risk of not doing it</b>
<b>Alternative 1</b>		
<b>Alternative 2</b>
